

Library Utilization/Day Statistics

#	Particulars	2022-23
1	Library Walk in / Day	198
2	Staff visit library / Day	5
3	Issue + Return / Day	141

Library Utilization/Monthly Statistics

#	Particulars	2022-23
1	Library Walk in / Monthly	3801
2	Staff visit library / Monthly	91
3	Issue + Return / Monthly	2707

Library Utilization/Annually Statistics

#	Particulars	2022-23
1	Library Walk in / Annually	45612
2	Staff visit library / Annually	1096
3	Issue + Return / Annually	32487

#	Library Working Days	230
---	----------------------	-----

- Method of computing the per day usage of library:

Monthly Usages = Annual Walking's / Months
= 45612 / 12
= 3801

Daily Usages = Annual Walking's / Working Days
= 45612 / 230
= 198

LibSys 4

The **CATALOGUING** system maintains a Titles in-Process file of all items that are accessioned. They are then catalogued. Catalogues are also produced by data import, or by network down loading or by direct data entry. In addition, this system covers catalogue maintenance; thesaurus construction; authority files; and holdings updates. Holdings summary by a range of Call Numbers, and 3x5 catalog cards can be printed. It provides the facility to provide Current Awareness Services such as SDI, special bibliographies, and lists of recent arrivals. It makes possible import/export of bibliographic data in both MARC and non-MARC formats; and automates the stock verification process.

The **CIRCULATION** system supports front desk operations such as checkins and checkouts, renewals, reservations and membership registration. It provides the option to generate and print bar-coded ID cards with the member's photograph. The system monitors titles on display, in circulation, and in bindery; has overdue follow-up and recall facility. It automates and thus simplifies inter-library loans and stock verification. LIBSYS provides great flexibility in operations. One may use bar code scanners for borrower and material identification. Query and Reports facilities cover a range of statistics on both borrowers and collection, including highly reserved titles, non-circulating material, number of checkins by title/borrower, delinquency cases, etc. The system keeps a complete log of all circulation transactions.

The **SERIALS** system provides for new subscription; subscription renewal; subscription extension; invoice processing; budget & expenditure analysis, recording of issues received (Kardex update); claims monitoring (including generating notices for issues 'not received', overdue, or received in a damaged condition); bindery management; recording and accessioning bound volumes; recording duplicate issues, special numbers, various indexes; online queries on various aspects of serial control including the holdings and circulation of all periodicals. The system includes the facility to provide user defined routing of the journals on the arrival of each issue through various individuals or departments.

OPAC (Online Public Access Catalogue) provides access to the library's holdings through various catalogues and indexes such as the author catalogue, the title catalogue, the subject catalogue, the classified catalogue, Publishers' index, Conference Place index and KWIC/KWOC indexes. Also possible are combination searches using Boolean operators that yield highly satisfying and precise results, however complex the query. OPAC also provides the facility to request acquisition of titles, to reserve materials; and to send personalised SDI, overdue/ recall/collect notices and messages by e-mail.

Web OPAC provides an advanced GUI to enable searching of the library database through an industry standard Web Browser such

as Netscape, Internet Explorer, etc.

ARTICLE INDEXING facilitates indexing and abstracting of articles from various journals in a separate database. It includes scanning of articles, entry of citation, online searches on author, keywords/descriptors and even word-based free text searches. This system also provides periodic documentation lists, personalised SDI, bibliographies on specific subjects, etc.

SOFTWARE UPGRADATION : Development is a continuous process at LIBSYS. The software is upgraded periodically with new features and expanded capabilities.

HARDWARE PLATFORMS : Supports Unix, Windows NT and Novell Netware in Client-Server environment using TCP/IP protocol.

Server Options :

- * Pentium based (Windows NT / SCO Unix / Linux / Unixware / Novell)
- * Alpha (OSF/1)
- * HP-9000 (HP-UX)
- * RS/6000 from IBM, (AIX)
- * Sun Sparc (SOLARIS)
- * SG (IRIX)

Client Platforms :

- * Windows 95/98/NT
- * X-Windows
- * Thin client (Java enabled)
- * Web client

LIBSYS doesn't need an RDBMS. However, available is the option of, LIBSYS with SQL Server or ORACLE as back-end RDBMS.

INSTALLATION SUPPORT : The scope of support provided includes customisation, training, user's manuals, database conversion, software updates, and counselling on phone or internet.

INSTALLATION BASE : LIBSYS is a versatile and field-proven software having more than 600 sites which include universities and other academic institutions, scientific laboratories, public libraries, corporate, as well as, government departmental libraries.

Annexure-I

INSTALLATION AND TRAINING

A phased approach for installation and training is suggested.

Level- I

LIBSYS 4 installation, setting up of Parameters and data loading along with overview of LIBSYS 4	: 2 days	On-site
Acquisition	: 2 days	At LibSys Training
Cataloguing	: 2 days	Center at Mumbai
Circulation	: 2 days	
Serials	: 2 days	
System administration	: 1 day	

Level-II

This 2nd stage of training would be scheduled within 3-6 months of Level I. The objective of this phase is to clear doubts of the staff on various functions of LIBSYS 4 and improve their understanding.

Cataloguing	: 1 day	At LibSys Training
Acquisition	: 1 day	Center at Mumbai
Circulation	: 1 day	
Serial	: 1 day	
System administration	: 1 day	

Same people who attended Phase I training should normally be attending training during this phase.
