# About VPIMSR

VPIMSR, Sangli named after the then Chief-Minister of Maharashtra State Shri. Vasantodada Patil was established in 1984 by the well-known versatile Visionary, Consultant and a leading Chartered Accountant Late Prof. Dr. A.D. Shinde Sir, who's Vision, Mission was to impart knowledge of professional programs and I.T. education to the student's community at large.

The Institute is situated at the border of South Maharashtra and North Karnataka that has an influx of students who need improvement in their communication & professional development skills. In compliance with its Vision and Mission the Institute has strived to meet these needs in its dedicated and disciplined journey of 39 years. VPIMSR caters to the specific needs of the students coming from country side and from the less privileged classes who cannot afford to join the ostentatious B-Schools in the cities for pursuing their academic goals. The Institute enables such students to venture into the ever expanding dynamic world of business and develop multi-skills in their lives. The Institute has excellent infrastructural facilities viz. several imposing buildings, well equipped computer labs connected by networks and Wi-Fi, Audio Visual Hall, Language Lab, Management Lab, E-Library and a good learning resource center that includes E- learning facility with Online Examination Centre. The Institute is accredited by NAAC Bengaluru with 'A' grade.

# ABOUT CONFERENCE

Dear Sir/Madam,

It gives us immense pleasure to inform you that, we are organizing an International Conference on “Technology and Innovation in Business” at V.P. Institute of Management Studies & Research, Sangli on 13<sup>th</sup> Jan. 2024.

Technology and Innovation in business management could give full of vitality to the development of enterprises and it has become the trend today. This conference expounds the current development status of enterprise business management, and analyzes the role of technological innovation in business management, the strategies of the application of scientific and technological innovation is increasing the emphasis on the strengthening the cultivation of talents, and improving business with the help of scientific and technological innovation.

In order to seize the initiative in the fierce market competition, businesses must pay attention to the application of technological innovation, improved the level of scientific and technological innovation of enterprises comprehensively through the application of diversified measures and improve the innovation mechanism. In the process of using technological innovation, some problems will inevitably arise. It is necessary for enterprises to take corresponding measures to give full play to the advantages of technological innovation in business management. In addition, business can not only achieve self-development but also can promote the development and progress of society by using innovative technology and combining results with actual process. Innovation is often necessary for companies to adapt and overcome the challenges of change. Achieving organizational and economic growth through innovation is key to staying afloat in today's highly competitive world. Innovation can distinguish business from others.

The emergence technologies like cloud and 5G, exponentially increases computing power and network speeds that can enable greater innovation. Developments in the metaverse of augmented and virtual reality open the doors to virtual research and development via digital twins, and immersive learning. Advances in AI, machine learning, and software 2.0 (machine-written code-ChatGPT) bring a range of new services and products, from autonomous vehicles to connected homes. AI driven speech, 5G, Augmented reality, Data analytics, Machine learning, Robotics, Industrial Internet of Things (IIoT) etc. are technologies promise access to virtually unlimited computing power and massive data sets, as well as a huge leap in bandwidth at low cost, making it cheaper and easier to test, launch, and scale innovations quickly. The resulting acceleration in innovation will mean that companies can expect more disruptions from more sources. Centralized strategic and innovation functions cannot hope to keep pace on their own. Companies will need to be much more involved in networks outside their organizations to spot, invest in, and even acquire promising opportunities.

Thus the technology and innovation in business increases productivity of individuals, processes, and business models by giving new ideas to business leaders to increase efficiency with minimum resources by reducing business and other risks.

Your active participation in the conference is highly solicited and appreciated.

Dr. R. A. Shinde Principal,  
VPIMSR, Sangli, Maharashtra- 416 414

# Sub Themes

## Business & Management

- Change Management
- Communications Management
- Environment Management
- Hospitality & Tourism Management
- Managing Innovation
- Disaster Management
- Operation Management
- Project Management
- Public Sector Management
- Risk Management
- Supply Chain Management
- Multinational Financial Management
