E-Zine

Editorial Note

Dear Readers,

On behalf of V.P. Institute of Management Studies and Research, Sangli, we are pleased to release the E-Zine 2023-24. It is an annual magazine with a vision to inform stakeholders of the Institute with respect to academic endeavors. As you are part of our VP family, it is your right and our responsibility to keep you updated with all the information that is expected to know. It is a deep of inspiration for us to release this e-magazine. We wholeheartedly solicit your feedback for enhancing the input for future publications. The editorial team is extremely thankful to Principal Dr. R. A. Shinde Sir for encouraging us to go ahead with this concept, thankful to Dr. M. M. Ali Sir for his continuous guidance in structuring this e-magazine as well as our colleagues for contributing their part of the information to make all this happen.

International Conference Report 2022-23

An International Conference was held on 25th Feb. 2023 on the topic "Digital Technology: It's Impact, Challenges and Opportunities" at V.P.Institute of Management Studies and Research, Sangli.

Digital technologies blending human and technical capabilities for business transformation. Digital platforms helps companies to build applications in a modular, scalable way and to readily access that data as per need. New technologies such as AI, Internet of Things (IoT), Machine Learning, Edge computing, Cloud computing etc. can enhance business transformation and spur new opportunities. Digital technologies are imperative for all business transformation from the small to the large enterprise. Technology plays a crucial role in an organization's ability to evolve with the market and continually increase value to customers. In recent years, the COVID-19 pandemic has brought new urgency to meet digital transformation goals and forced many organizations to speed up transformation work. IT has become the primary driver for business innovation. Embracing this shift requires everyone in the company to rethink the role and impact of IT in their day-to-day experience. Digital transformation initiatives often reshape workgroups, job titles, and longtime business processes. Digital technologies helps to change business process to become more efficient or effective. The idea is to use technology to transform that service into something significantly better. Many companies have yet to apply digital technologies and ways of working at scale, whereas many companies are planning end-to-end transformations but have yet to move beyond the drawing board. To create a digital culture that embraces change, experimentation, continual learning and improvement is required. Transformations succeeds when they are incremental, cost-effective, and sustainable. Its focus is on outcomes like new products, improved processes, invention and automation in services etc. which build capabilities, business value and buy-in for the transformation. Our approach is focused on promoting, implementing digital technologies for holistic development of organizations.

For the International Conference, we were privileged and honored to have an esteemed Chief guest Hon. Dr. Prashant Kharat, HOD, Information & Technology, Computer Dept., Walchand College of Engineering , Sangli.

We delighted to have among us our Keynote Address – Dr. Sivaramalingam Kirushanth Head, Department of Physical Science University of Vavuniya, Sri Lanka and another Keynote Address – Pastor R. Arguelles Jr. Dean, College of Computer Studies University of Perpetual Help System Dalta, Molino, Philippines.

For valedictory function we invited Hon. Dr. B.P. Ladgaonkar, Principal, Smt. Kasturbai Walchand College,Sangli

The research papers were published under Special Issue in International Research Journal of Humanities and Interdisciplinary Studies (IRJHIS) an open Access, Peer Reviewed International Journal.
ISSN-2582-8568
Impact Factor- 5.828

Total 67 selected papers were published. We received papers from different states- from India: 100 papers and one papers from Germany respectively.

Conference Convener: Dr.S.T. Bhosale

Language Club Activities: 2023-24

Language Club is the Club established with the aim of helping students in learning fluent English language. Our Language Club activities are conducted every Thursday after the regular lectures. In the academic year 2023-24, through the Language Club we have conducted various activities for Language Club Members on improving their writing skills, Speaking skills, Grammar improvement, Creativity, Vocabulary and so on. It helped students a lot to succeed in their studies. Students also prepare Articles, Poetry, Book Review, Drawing, and Crossword Puzzle etc. which are displayed every week on the E-planet Board.

- **Objectives of Conducting Language club Activities**
    1. To provide platform to students to learn English language fluently.
    2. To help students to overcome with fear of speaking English Language.
    3. To help students to become more confident and fluent in English.
    4. To give opportunities to students to showcase their skills and talents.
- **Learning Outcomes**
    1. Learn extensive vocabulary, chunks of phrases, linking verbs.
    2. Learn grammar and speak fluently in everyday situations.
    3. Learn English pronunciation and real spoken English.
    4. Enhance quick learning through the fun way in a casual setting.

- **List of Activities conducted By Language Club in Year 2023-24**

Date	Activity Name
10 August 2023	Spelling Chain
16 August 2023	Spin the Wheel
24 August 2023	Choose the Number
31 August 2023	Gallery Walk
14 September 2023	Newspaper Tower
21 September 2023	Scan the Passage
28 September 2023	Running Dictation
5 October 2023	Run For your Words

Glimpse of Activities 2K23-24

Activity Spelling Chain   : 10 August 2023

Activity   Spin the Wheel   : 16 August 2023

OUTREACH EXTENSION ACTIVITY

A ONE DAY WORKSHOP ON

"FOSTERING LIFE SKILLS"

Organized by Language Club

Date: 21st March 2023

A successful Workshop, titled "Fostering Life Skills" was organized by the Language Club of VPIMSR, Sangli.

The purpose of this Workshop was
- To give all the attendees an experience of the 'Fun With Learn' concept.
- To conduct fun activities that would teach the students some basic life skills.
- To foster Skills like Team Building, Speaking, Writing, Reading, Creativity, Listening, Coordination.

A crowd of 70 students was present for the Workshop from three different colleges namely:
1. Rajmati Nemogonda Patil Kanya Mahavidyalay, Sangli.
2. Mathubai Garware Kanya Mahavidyalay, Sangli.
3. Kanya Mahavidyalay, Miraj.

The Workshop started with the traditional ritual of lamp lighting. An enthusiastic start was given to the Workshop by the ACTILS of Language Club. Each activity had its own objective and was planned with the aim of 100% participation of the students. Each and every activity conducted was thoroughly enjoyed by the students.

The Feedbacks provided by the students were positive and clearly justified how successful the Workshop was. It was all due to the team work, coordination and great efforts of our ACTILS and the Language Club Mentors that this Workshop had such a great and successful outcome.

Lamp Lighting Ceremony at the hands of Prof. M.M.Samudre, Head of Commerce & Management Department:

Faculties present for the workshop:

A look at the activities conducted in the Workshop:

Activity 1: Word Ladder

DEPARTMENT OF SPORTS

1 JANUARY 2023 TO 31 DECEMBER 2023

In this year 2022-23 Sports Department organized many activity programms. Starts from January 12th. Swami Vivekanand Jayanti was celebrated and Guest lecture was held for this programme . Mr.Sunil Kulkarni (Member of Swami Vivkanand Sanstha, Sangli.) provided his prominent presence and guidance to our students. On the same day we orgnized World Surynamaskar Din in which various students of the college took part. Collective 51 Suryanamskar were performed on that day. Also Annual Sports competition was organized in 3rd week of March. Students of all departments of the college participated in the annual sports competition. Varioius Sports were orgnized for the Anuual Sports. Games   such as Volleyball, Kho-Kho, Kabaddi, Cricket, Dodgeball, Badminton, Chess, Carrom, Table-Tennis, Long Jump, Shot-put etc. were orgnized . In the Annual Sports Competition the winnig players were faliciataed with certifictes and trophies.

24th January is celebrated as Physical Education Day. On the occasion of the day being celebrated,Mr. Madhukar Pagade (Karate Coach) was invited. He demonstrated Karate for the students of the college. 21 June celebrated as Inter-national Yoga day. On the occasion of the day Dr. Chandrakant Patil (Ex-Professor & HOD of Kriya Sharir) gave valuable guidance on yoga to the students. After that Mrs. Poonam Natu (Yoga Teacher) demonstrated yoga for the students.

Our Insitute orgnized various Sports Workshops.Mr. Shubham Vadar (National Player & Coach) was present for the Volleyball Workshop. Mr. Parijatak Natu (National refaree & Coach) was present for the Badminton Workshop. Mr. Amol Korade (State Player & Coach) was present for the Kho-Kho Workshop.

29th August is celebrated as National Sports Day ,on this day Mr. Ashok Kale (Principal of B. P.ED College Miraj) gave valuable guidance to the students on the importance of sports. On this day the students of the college performed various sports and some students expressed their thoughts about Sports.

13 team events & Individual sports participated in Sangli Zonal Sports. Badminton Gils team won 2nd place in Sangli zonal sports , teakwondo girls won silver medal. And Chess student won 6th place in Sangli zonal sports. Total 94 players participated in Sangli zonal sports this year.

Our institute orgnized Sangli zonal Table-Tennis (Men / Women) under Shivaji University, Kolhapur. Mr.Rustum Jamadar (Bank Manager/ Alumani) was Present as a Chief guest. Dr. Amitraj Mane (zonal secretory),Phy. Director of various colleges,Dr.R. M.Yallatti,Staff of VPIMSR was presented for inugration of Sangli zonal table-tennis.

On March 8, 2023, various activities were organized in the college to celebrate International Women's Day.

A. Lecture regarding health problems for women and students by Dr. Mrs. Supriya Kulkarni, Ayurveda expert and yoga teacher.

B.Essay competition for students.

All the boys and girls of the BBA class participated in the essay competition......

Some Sample Essay
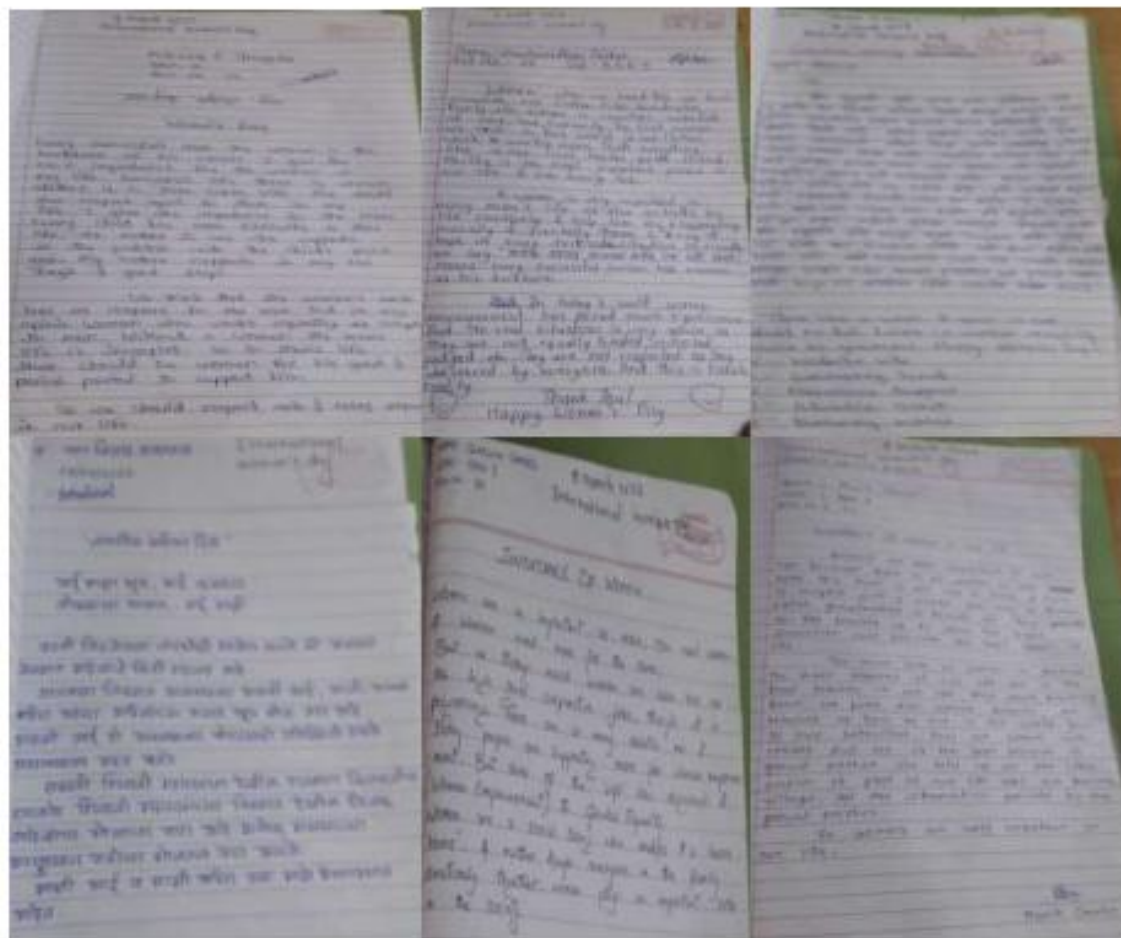

Students took pledge of social message on the occasion of Women's day.

V. P. Institute of Management Studies & Research, Sangli

Date: 8th March, 2023

Pledge on the Occasion of International Women's Day

We the students of VPIMSR, Sangli

promise to commit our lives to

the development of self growth, education & career,

without compromising our rights & self respect.

To fight every situation with courage & dignity, reason and self defence.

We pledge to keep fit, educate our masses and reach out to the needy.

We will strive to be the enlightened women of power and source of infinite

strength.

On this day, we stand together to pledge in one voice to be the strongest in

the world. This is our commitment.

JAI HIND

Staff Welfare Programme :

A two-day training program on "Team Building", organized by our CSIBER Trust, Kolhapur, held on 17th and 18th March, 2023 at Amba Resort, for all the staff, under the Staff Welfare Program. Mr. Toro was appointed as a coach. He guided various aspects of team building. All the staff members enthusiastically participated in this training. Everyone had a lot of fun in this training

Staff Welfare Programme: Culture Programme :

In order to get some relaxation from all our daily activities, a short entertainment program was organized by the Department of Culture (MDC) of our college under staff-welfare only for our staff. . The program was graced by Central Bureau of Communications, Regional Office, Kolhapur-Ministry of Information and Broadcasting-Government of India Hon. Mr. Mahesh Chopde, (Regional Publicity Officer) and Mr. Pramod Khandagale (Regional Publicity Assistant) was present.

Lakshay 2023 :

As per convention of V.P. culture, various programs were organized in the college during the Annual Programme of Lakshay 2K 22. Students, professors and nonteaching staff enthusiastically participated in all the programs. Various competitions were organized under the cultural programme….

1 Business Plan 2 Poster Presentations 3 Rangmanch 4 Group Dance/Singing

NAAC Cultural Programme :

NAAC Cultural Programme :

The Cultural Programme was presented by the MDC students in the presence of NAAC Committee.

Dhol Baje Prorgramme.

व्ही. पी. इन्स्टिटट्यूट ऑफ मॅनेजमेन्ट स्टडीज अँड रिसर्च, सांगली या महाविद्यालयामधील सांस्कृतिक विभागातर्फे विद्यार्थ्यांसाठी "ढोलबाजे" हा सांस्कृतिक कार्यक्रम नुकताक उत्साहामध्ये संपन्न झाला. या कार्यक्रमा मध्ये रांगोळी, ग्राफिक डिझाईन, मार्केटिंग स्टॉल, फूड स्टॉल,फनी गेम्स स्टॉल आणि दांडिया अश्या विविध स्पर्धांचे आयोजन करण्यात आले होते. सदर स्पर्धांमधून राष्ट्रीय एकात्मता तर निदर्शनास आलीच .पण व्यसनमुक्ती, एकात्मता, राज्यांमधील विविध खाद्यसंस्कृती, नृत्यपरंपरा असे विविध सामाजिक संदेश या स्पर्धांमधून देण्यात आले.

कार्यक्रमाचे उद्घाटन संस्थेचे वरिष्ठ प्राध्यापक डॉ.आर.एम.यल्लट्टी, वाणिज्य व व्यवस्थापन विभागाचे विभाग प्रमुख प्रा.एम.एम.समुद्रे, संगणक विभागाचे प्राध्यापक डॉ. एस.टी.भोसले यांच्या हस्ते करण्यात आले. सर्व वर्गातील सुमारे 200 विद्यार्थ्यांनी या स्पर्धांमध्ये भाग घेतला. सर्व प्राध्यापक वर्गांनी आणि विद्यार्थ्यांनी या कार्यक्रमा मध्ये उत्साहाने सहभाग घेतला.

कार्यक्रमाचा समारोप स्पर्धेतील विजेत्यांना बक्षीस देऊन करण्यात आला. समारोप समारंभास सांगली मधील प्रसिद्ध नृत्यशिक्षिका श्री गणेश मनवार आणि सौ. पूनम मनवार हे प्रमुख पाहुणे म्हणून उपस्थित होते. त्यांनी दांडिया स्पर्धेचे परीक्षक म्हणून देखील काम पहिले. कार्यक्रमाचे संयोजन बंथपाल आणि सांस्कृतिक विभाग प्रमुख डॉ. सौ. अपर्णा मकरंद कुलकर्णी आणि प्रा.किरण जसवानी यांनी केले. कार्यक्रमच्या संयोजनासाठी संस्थेचे प्राचार्य डॉ.आर.ए.शिंदे आणि वरिष्ठ प्राध्यापक डॉ. एम.एम.अली यांचेमार्गदर्शन लाभले.

EMOTIONAL INTELLIGENCE AND ARTIFICIAL INTELLIGENCE : DIFFERENT YET CORDIAL

Author Names :   Shrutika Satish Khamkar &
Najmunnisa Rafik Jamadar**.**

Programme : Bachelors in Computer Applications (BCA)

College : V P Institute of Management Studies And Research.

ABSTRACT :

Artificial intelligence (AI) and Emotional intelligence (EI) are two separate types of intelligence that are becoming more and more important in our daily lives . Emotional intelligence has long been researched, while artificial intelligence is a relatively new topic. Significant progress has been made in fields including healthcare and communication as a result of recent advances in AI. Still, there are key distinctions between emotional intelligence and artificial intelligence. To guarantee that we use AI responsibly and successfully, it is imperative that we comprehend these differences. Artificial intelligence (AI), with its capacity for logic and analysis, can support emotional intelligence in some ways but not entirely replace the complex comprehension of human emotions. Even with AI's advances, it is still unable to fully mimic the level of empathy and social understanding that characterises emotional intelligence.

Keywords :

- Emotional Intelligence , Emotional Quotient , Neural Networks , Natural language processing , Emotional artificial intelligence , Machine Learning ,Deep learning , Sentiment Analysis , Algorithms

Objectives :

- To comprehend emotional intelligence and artificial intelligence .
- To understand the key differences between them .
- To understand the importance of using AI responsibly .

What is Emotional Intelligence :

The capacity to identify, control, and understand one's own emotions as well as those of others is known as emotional intelligence. It is also known as the emotional quotient (EQ).Another way to define emotional intelligence is the capacity to recognise the feelings of individuals around them and attempt to assist them in determining the source of those feelings. Possessing a high EQ facilitates the development of positive working relationships as well as the completion of assignments, problem-solving, and goal-achieving. Our decisions concerning certain things or situations are influenced by our emotions.

EI involves five key elements :

Self-awareness is the ability to analyse our own feelings and determine what words or circumstances make us feel a certain way at that particular time.

Self-regulation is the ability to respond to situations with composure and effort rather than jumping to conclusions.

Motivation is the ability to focus one's thoughts and emotions in the proper directions, which leads to efficient problem resolution.

Empathy is the capacity to place oneself in another person's shoes in order to comprehend that person's feelings.

What is Artificial Intelligence :

The creation of intelligent machines that are capable of managing problems and making decisions—tasks that usually require human ability is known as artificial intelligence, or AI. These devices utilize algorithms and machine learning approaches to evaluate massive volumes of data and make judgments based on that data. Numerous industries, including media, entertainment, healthcare, and more, use AI technology. AI is gaining more attention because of its most impressive features such as self-learn, self-analyse, and self-correct with little or no human interaction.

Several significant distinctions between the behaviour of AI and EI become apparent when comparing them:

1. Nature of Focus:

- AI is primarily concerned with data and analytics and is based on machines and logic.
- Emotions are central to emotional intelligence (EI), which emphasises interpersonal interactions.

2. Learnability:
- Training and programming are two ways that AI can be taught.
- Emotional intelligence is more innate and has the capacity to develop, but it is based on inherent features
.
3. Functionality:
- AI collects and evaluates data, performing particularly well in jobs involving pattern recognition and data interpretation.
- With a focus on comprehending and navigating human emotions and relationships, emotional intelligence (EI) detects and regulates emotions.

EMOTION AI: WHAT IS IT?

A subclass of artificial intelligence called emotion artificial intelligence (sometimes referred to as affective AI or affective computing) studies, responds to, and replicates human emotions.

Emotion AI analyses human emotional signals from text, audio, and video by utilising natural language processing, sentiment analysis, voice emotion AI, and facial movement analysis.

Artificial intelligence (AI) that recognises and deciphers human emotions in text (through sentiment analysis and natural language processing), audio (voice emotion AI), video (facial movement analysis, gait analysis, and physiological signals), or any combination of these is known as emotion AI.

Artificial Emotional intelligence (AEI) may be utilised in the future to evaluate a driver's performance, identify insurance fraud, diagnose depression, and gauge a student's understanding of a lesson.

Emotion AI's prospect for the development of AI technology appears promising. By 2027, it is anticipated that the market for emotion recognition would have grown by 12.9%.
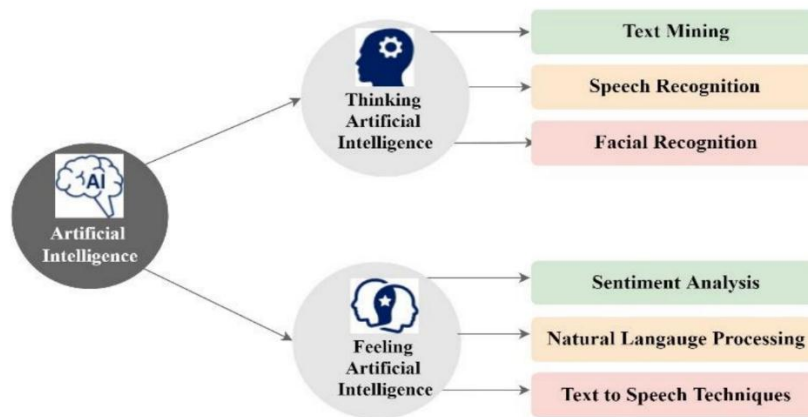

Techniques for developing Emotion AI

A) Natural Language Processor (NLP):

The goal of natural language processing (NLP) the subfield of artificial intelligence (AI) is to enable machines to comprehend, interpret, and produce human language. NLP techniques are essential to the development of emotional AI because they enable computers to search for emotional content in speech and text. NLP can assist AI systems in identifying and comprehending the emotions expressed in spoken or written language by extracting elements like sentence structure, tone, and word choice.

Sentiment analysis, which includes categorising text or speech as positive, negative, or neutral, and emotion classification, which seeks to identify certain emotions like happiness, rage, or sadness, are important NLP techniques used in emotional AI. These methods can be used for a variety of purposes, such as assessing user emotions and responding appropriately by examining conversational data, social media posts, and customer reviews.

B) Computer Vision And Facial Expression Recognition :

Another crucial element of emotional AI is computer vision, which gives robots the ability to evaluate and comprehend visual data like pictures and videos. AI systems are able to understand emotions by analysing and recognising face expressions through the use of computer vision algorithms.

In order to recognise facial expressions, a person must first identify faces in pictures or videos, then identify facial landmarks (such as the location of the mouth, nose, and eyes), and finally use machine learning algorithms to categorise the identified expressions according to a predetermined range of emotions. Real-time execution of this procedure enables AI systems to react to users' emotions as they engage with the system.

C) Sentiment Analysis and Machine Learning Algorithms :

The technique of identifying the sentiment or emotion expressed in a text or speech is known as sentiment analysis, and it frequently involves classifying the emotion as positive, negative, or neutral. Since machine learning algorithms may be trained to identify patterns and characteristics linked to particular emotions, they are important to sentiment analysis.

For sentiment analysis, a variety of machine learning methods are employed, including logistic regression, support vector machines (SVM), and decision trees. Labelled datasets, which include text or speech samples annotated with the corresponding emotions, can be used to train these algorithms. After being trained, the algorithms can be applied to new, unlabelled data to analyse and categorise it according to the patterns it has discovered.

D) Deep Learning and Neural Networks :

Artificial neural networks are used in deep learning, a kind of machine learning, to model and resolve complicated issues. Neural networks, which are meant to resemble the structure and operation of the human brain, are made up of interconnected layers of nodes, or neurons.

Since deep learning can automatically learn and extract features from raw data—such as speech, text, or images without the need for manual feature engineering, it has shown to be especially useful in the development of emotional AI. Deep learning models can now grasp intricate patterns and correlations between data and emotions because to this feature.

Because convolutional neural networks (CNNs) can automatically train to recognise facial characteristics and expressions from picture data, they are a popular deep learning architecture for facial expression identification. Similar to this, as they can simulate temporal dependencies and grasp linguistic context, recurrent neural networks (RNNs) and their variations, such Long Short-Term Memory (LSTM) networks, have been extensively employed for emotion recognition from speech and text.

AI researchers and engineers are creating more complex emotional AI systems that can comprehend and react to human emotions more accurately and nuancedly by integrating various approaches and iteratively improving their models.

What AI cannot do without the human factor :

Though it is not a fair discussion, artificial intelligence and human intelligence are still at odds. AI still has a long way to go before it can equal the capacity of the human brain, even though it has progressed to the point where intelligent computers like AlphaGo and DeepBlue can perform better than humans in specific activities. One of the main distinctions between artificial and human intelligence is that, although taught and built to copy and simulate human behaviour, AI systems are not capable of making rational decisions. The data that artificial intelligence computers are fed makes a distinction between artificial intelligence and human intelligence. AI systems are not very good at solving problems; instead, most of their ability to make decisions comes from occurrences, the data they have been educated on, and how those events relate to

one another. "Your models are only as good as your data, no matter how good they are," states a SQL Services Data Scientist, Nick Burns. They lack common sense; hence they are unable to comprehend the idea of "cause and effect. "However, people have the exceptional capacity to learn new things and use them in conjunction with comprehension, reasoning, and logic. One quality that distinguishes people from machines: they are able to handle real-world situations comprehensively, analytically, rationally, and emotionally. One of the main distinctions between human and artificial intelligence is this. Consequently, human intelligence appears to be far more feasible than machine intelligence in certain areas of intelligence.

CONCLUSION :

- Although artificial intelligence (AI) has advanced significantly in recent years, there is still a long way to go before it can fully mimic human intelligence.
- We can make sure that artificial intelligence is used ethically and responsibly by being aware of the distinctions between artificial intelligence and human intelligence.
- Although learning, thinking, and problem-solving are all components of both artificial and human intelligence, there are important distinctions between the two.
- AI is a branch of computer science that uses machine learning and algorithms to carry out tasks. Emotional intelligence, on the other hand, is a sophisticated byproduct of biological and cognitive processes that incorporate subjective experiences like feelings, moral reasoning, and creativity.
- The distinctions between artificial and human intelligence highlight the necessity of developing and using AI responsibly, taking into account both the relevance of human judgement and its limitations.
- AI has the potential to greatly enhance our lives, but we must make sure that our humanity is not sacrificed in the process.
- Emotional AI are not a substitute for professional help.

स्टूडेंट की दशा

−तस्कीन देवजानी

कहते हैं "Brain is the most outstanding organ. It works for 24 hours, 365 days, right from your birth, until you step in the exam hall"

हे भगवान जब-जब   इग्ज़ैम आती है मुझे तुम्हारी याद आती है।

इग्ज़ैम के वक्त एक ही गाना आता है दिमाग में:

मार्क्स बरसा देना तू,   इग्ज़ैम आया है

किताबें और मेरे मिलने का, मौसम आया है

सबसे छुपा के तुझे पढ़ना है

टेंशन में तेरे हद से गुज़र जाना है

इतना टेंशन किसी पे, सेमेस्टर में पहली बार आया है

 ये हिस्ट्री कौन कब आया कौन गया कैसे याद रखे बाबर, हुमायू, अकबर, जहांगीर कौन किसका बाप और कौन किसका बेटा? हमें अपने दादा पर दादा के नाम याद नहीं रहते अब क्या इनका नाम याद रखेंगे।

हिस्ट्री में आठ-आठ हेनरी गुज़रे हैं! हेनरी ने कौन सा काम किया था और ये याद रखना आसान थोड़ी है।

हेनरी 8 की जगह हेनरी 7 लिख दिया तो सारे मार्क्स गायब।

और तुम हिस्ट्री का भाई भूगोल पूछते हो कि पृथ्वी गोल क्यों है? हमें क्या पता यह गोल क्यों है, हमने तो लिख दिया "मम्मी की रोटी गोल-गोल, पापा का पैसा भी गोल-गोल, इसके लिए धरती भी गोल-गोल।" पता है फिर टीचर ने क्या कहा? टीचर ने कहा "तुम्हारे मार्क्स भी गोल-गोल।"

अंग्रेज चले गए पर अंग्रेजी छोड़ गए। हर शब्द की स्पेलिंग अलग डी - ओ डू होता है पर एस – ओ सु नहीं होता।

 मैथ्स की तो पूछिए ही मत 3 में से 6 गए तो कितने बचे? 3 में से 6 भी जाता है कभी।

 जैसा थोड़ा सा गंदा पानी शुद्ध तालाब को गंदा कर देता है वैसे ही मैथ्स सारे परसेंटेज को खराब कर देता है।

ज्योमेट्री की तो बात ही मत करना एबीसी लिखो या सीबीए क्या फर्क पड़ता है? अब दाल चावल बोलो या चावल दाल एक ही बात है।

बाघ्या में ना जाने कौन सा पाप है रात को रात हो तो सुबह मैदान साफ है।

दिल कहता है जी ले ज़रा, किताबे खेती है पढ़ ले ज़रा।

ये तो हो गई इग्ज़ैम की बात, अब करते हैं दोस्तों की बात

दोस्त 1 ऐसा 'चोर' होता है जो आंखों से आंसू,

चेहरे से परेशानी, दिल से मयूसी,

जिंदगी से दुख और हाथों की लकीरों से मौत तक को चुरा लेता है।

मेरे दोस्तों की शान में शेर अर्ज है

आँसू तेरे निकले तो आँखें मेरी हो,

दिल तेरा धड़के तो धड़कन मेरी हो,

खुदा करे दोस्ती हमारी इतनी गहरी हो,

जुतिया आपको पढें और कारतूस मेरी हो।

The Translator

Making every word easy can be task,

But helping everyone is our first class.

No matter how many problems we would face,

Still aim is to make everyone able to run in case.

It is proud moment ,when everyone says,

"These are creators".

Because it give us energy to translate every

Word as easy as signature.

Studying in quality. giving in quantity is a

Priority of our work;

Because every member learning from us,

Requires qualitative content for their work.

Translators are like stars,

Who shines in dark.

Because they know there work is ,

As important as earning good marks.

"A Journey Through the Cultural Drapery: Exploring Kolkata's Enchanting Charms"

-By Deep Panja

Kolkata, the cultural capital of India, is a city that seamlessly weaves history, art, and tradition into its vibrant Drapery. As I embarked on a journey to explore this interesting city also known as 'the city of joy', I found myself immersed in a unique blend of old-world charm and contemporary vibrancy.

The Historic Heart:

My first stop was the iconic Victoria Memorial, a testament to the city's colonial past. The grand of its architecture and the lush gardens surrounding it transported me to a bygone era. Walking along the bank of Hooghly river, I marvelled at the Howrah Bridge, an engineering marvel that stands as a symbol of Kolkata's resilience.

Revolutionary Artefacts:

The collection of artefacts is a treasure trove that includes handwritten letters, original newspapers, and personal belongings of iconic leaders. Seeing items that once belonged to figures like Netaji Subhas Chandra Bose and Mahatma Gandhi adds a personal dimension to their historical significance. The museum cleverly employs interactive exhibits, allowing visitors to engage with historical documents, letters, and audio recordings. The challenges faced by the freedom fighters, fostering a profound appreciation for their indomitable spirit.

Leaving the Freedom Fighters Museum, I carried with me a profound sense of gratitude for the sacrifices made by those who gravel the way for India's freedom. The experience not only enriched my historical understanding but also ignited a renewed appreciation for the principles of justice, equality, and democracy.

Cultural Kaleidoscope:

A visit to the Kalighat Kali Temple offered a spiritual experience, with devotees immersed in rituals and the air filled with the scent. The Dakshineswar Kali Temple, on the other hand, provided a calm, peaceful, restful escape with its riverside setting.

Culinary Delights: Kolkata is a heaven for food enthusiasts. From the aromatic street food of College Street to the exquisite Bengali sweets at KC Das like Mishti Doi, Roshogulla and Rajbhog, Shondesh and many more every bite was a journey through the city's culinary heritage. I couldn't resist trying the famous Kolkata biryani, a mouth-watering fusion of flavours that left a long-lasting impression

Literary Heaven:

The intellectual ambiance of College Street Book Market beckoned, offering a treasure of books and a glimpse into the city's literary legacy. Coffee houses like Indian Coffee House and Flurry's became my heavens for quiet reflection, adda sessions, and as the breeding place of several political and cultural personalities and movements. Surrounded by the echoes of discussions that once shaped the nation.

Artistic Retreats:

Kolkata's commitment to the various arts was obvious in its numerous galleries and cultural spaces. The Indian Museum showcased an impressive collection, while the Academy of Fine Arts celebrated the city's current art scenes. The annual Durga Puja festival transformed the streets into an open-air gallery, with complex and puzzling pandals and artistic expressions at every turn.

Nostalgic Navigators:

Kolkata boasts one of the oldest tram networks in Asia, dating back to 1902. The vintage charm of these slow-moving carriages evokes a sense of nostalgia, taking passengers on a journey back in time. During festivals like Durga Puja, the inside of the trams transforms into mobile art installations. Elaborate decorations, bright lights, and cultural performances turn these moving carriages into an essential part of the city's festivities, adding a unique dimension to the celebration. An age where sustainability is important, trams stand out as an eco-friendly choice. Their electric power source aligns with modern environmental concerns, offering a glimpse of how traditional modes of transport can be adapted for a greener future.

Warmth of the People:

What truly made my journey memorable was the warmth of the people. Kolkata's residents welcomed me with open arms, sharing stories that added a personal touch to my travel experience.

To conclude, my travel experience in Kolkata was a fascinating journey through a city that seamlessly blends history, culture, and warmth. From the historical landmarks to the flavours of its culinary delights, Kolkata left an unforgettable memorial mark, inviting me to explore its enchanting charms and bring up a deep appreciation for its rich heritage.

भारत : एक नई सोच !!

खूब लड़ी मर्दानी वह तो झांसी वाली रानी थी,
हर लड़की में जिंदा आज भी वह ऐसी वीर कहानी थी।

चले थे बापू ऐनक पहने लाठी लेकर दुबले-पतले,
फिर भी ताकत के क्या कहने जगने माने इनके कहने।

"इंकलाब जिंदाबाद!!" था भगत सिंह का नारा,
डर गए अंग्रेज सुनकर राजगुरु का जवाब करारा

आओ उनको याद करें,
शहीदों का सम्मान करें।
एक बार फिर सब देश का झंडा हाथ धरे ।

इसीलिए मेरा भारत, मेरा भारत महान है !!
सारे जहां से अच्छा हिंदूसीता हमारा, हम बुलबुले हैं इसके यह गुलसिता हमारा।

VISION

VISION

" To foster ideas, courage determinations and to promote equal opportunities in higher education to the students community. To educate and prepare students community for professional excellence in an ever-changing complex business globe

MISSION

MISSION

"By adopting variety of modern pedagogies to faciliate the students in understanding, developing, interaction and applying core and specialized concepts and practies and to prepare students academically up-dated and professionlly capable to accept and face the future challenges of market needs in the field of information technology, industrial automation and various functional areas of management."

Courses Offered

COURSES OFFERED
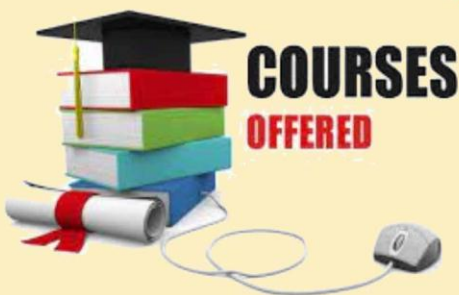

➤	BBA	Bachelor of Business Administration
➤	BCA	Bachelor of Computer Applications
➤	MBA	Master of Business Administration
➤	MCA	Master of Computer Applications.
➤	M.Com	Master of Commerce
➤	DBM	Diploma in Business Management
➤	DIT	Diploma in Taxation
➤	PGDCA	P. G. Diploma in Computer Applications.
